

# INTRODUCING

# addagrip™ ecoHEAT Surfacing

the latest innovation in heat harnessing resin bound paving

## What is it Adddagrip Ecoheat Surfacing?

Addagrip Terraco Ltd and EcoHeat Surfaces have joined forces to promote a unique surfacing solution - Adddagrip EcoHeat Surfacing - combining Adddagrip's quality Resin Bound porous surfacing finishes with Ecoheat Surfaces patented inlaid pipe system that connects to a renewable energy source, offering a reactive heat storing surface to suit changing climate conditions.

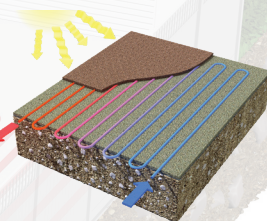

## Guide Price

A guide price for installation of the Adddagrip Ecoheat Surfacing system onto an existing sound base is £125 - £150 /m2 based on minimum 50m2 area. (Installation includes Adddagrip Ecoheat base, pipes, resin bound surfacing, manifold and connection to existing heat pump). Site survey & full detailed quotation will be required for every project.

## How does it work?

### SUNNY DAYS

Removes heat from the surface when the sun shines, and uses it for hot water and heating

### COLD DAYS

Renewable heat from air source heat pump, combined with waste heat from water waste, excess heat and extracted waste heat from air used to keep resin bound surface from freezing.

Manufacturers of quality resin surfacing systems since 1980

# INTRODUCING

# addagrip™ ecoHEAT Surfacing

the latest innovation in heat harnessing resin bound paving

Porous  
(SuDS)

## Features & Benefits

- Provides free green energy from the sun
- Decorative hardwearing Resin Bound surface
- Inlay patent pipe system for renewable energy
- Permeable SUDs compliant
- Slip resistant
- Low maintenance
- Heats water to 50 degrees
- Prevents ice and snow build up on surface
- Reduces carbon emissions
- Produces cost free hot water
- Heats water for central heating

## Suitable for domestic & commercial projects

Domestic Drives - Pool Surrounds - Courtyards  
Hospitals - Airports - Railways Stations - Offices  
Schools - Hotels - Sports Venues - Supermarkets
